

Year 9 Mid Year Assessment Revision

Topics:

- Evidence and causes of climate change (physical & human)
- The greenhouse effect and the enhanced greenhouse effect
- Responses to climate change
- Location & features of emerging countries
- Employment structures in emerging countries
- Examples of emerging countries successes
- TNCs in emerging countries

Suggested Activities:

- Mind map - write down as much as you can remember about particular sub-topics
- REDO of exam/assessment questions in your book, including from your end of topic tests.
- Key word tests - write down as many key terms as you can, giving specific definitions and examples of where they have come from and where they are found in your content

Materials to use:

- Exercise books - these contain all your key materials and topics which you will need and will be assessed on. Take time to look at the materials on Teams to check you have all the finished content possible.
- In particular, focus on your SKILLS and PREVIOUS ASSESSMENTS - look at how you have done on these skills previously and the feedback you were given and PRACTICE AT LEAST ONE of them again, trying to perfect it this time!
- Knowledge Organisers - these are glued into your book but I have also placed these in Teams. You can utilise these to support your revision, starting with a task from memory and then using the KO as a way of filling in the blanks. Great for key words too!
